

- This PowerPoint slides use **Morph** transition for most of the animations, you can check if you have the transition in your PowerPoint in Transitions Tab. (Refer to [here](#) for more info)
 - According to Microsoft, Morph is available if you have a Microsoft 365 subscription or are using PowerPoint 2019 or PowerPoint 2021. ([Link](#))
 - If your PowerPoint does not support it, please go to the following [link](#) to access the prototype.
- PLEASE GO THROUGH the **tutorial slides** that is located at the start of the presentation.
- The summary of the tutorial slides is attached below:

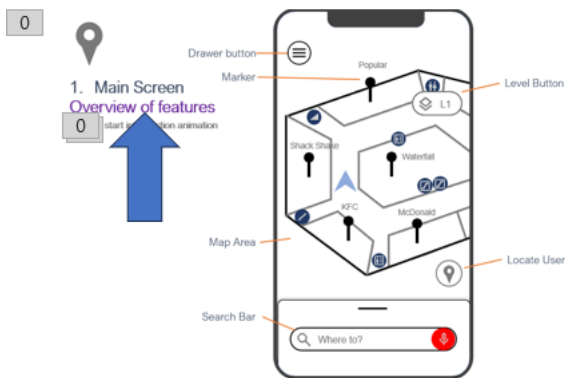

Introduction

There are **two** types of slides (**Type Overview** / **Type Specific**):

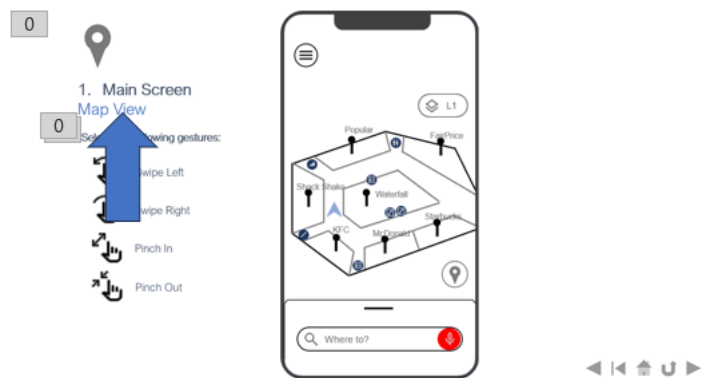

Most, if not everything, on the **Type Overview** are **clickable**.

On the other hand, most button in **Type Specific** will **NOT** be **clickable**, except explicitly mentioned (pointed).

You can distinguish between them **checking the subtitle**:

Type Overview

Type Specific

There is **two** ways to go through the slides:

Type 1: Go through the slides as if the pages are not clickable

Type 2: Go through the slides by returning to **type overview**
